

## Benomic scissor lift

### We offer you:

- Fast commissioning
- Ease of maintenance
- Ergonomic system
- Stable and well-arranged system

The Benomic scissor lift is indispensable in the greenhouse. The Benomic is made for carrying out maintenance work at the right level. Stability, maintenance and ease of use were the starting points for developing the Benomic. Through the use of proven technologies, the Benomic is reliable in use and low in maintenance. Well-arranged controls and a selection of lifting heights ensure that activities are carried out in an ergonomically responsible manner. Its robust design and hygienic finish make the Benomic indispensable with cultivation and maintenance activities.

# Benomic scissor lift

The clear dashboard, with as few switches and controls as possible, ensures quick acceptance from the operator.

Because the foot pedal comes flush with the level of the platform, this increases the ergonomic posture for the employee.

Easily accessible parts and proven technology ensure simple and minimal maintenance.

The use of proven technology makes the out riggers easy to adjust, ensuring your stability and guaranteeing your safety.
